User stories

- As a user, I want to…

    - **log in** to have access to a personalized account

    - add **tasks** so I can keep track of my tasks

    - add **working periods** to keep tracks of my work habits

    - **attach** working periods to tasks to see which tasks are progressing

    - **evaluate** the quality of my working periods to see trends in my work

    - attach **dates and lengths** to working periods to see trends in my work

    - see automatically made **stats** to see trends in my work

    - mark a task as **finished** so I can see what I no longer need to work on

    - **estimate how long a task will take** so I can see how good I am at estimating

    - **estimate my progress** while working on a task so I can see how long it will take to finish

    - attach tasks to self-defined **classes** so I can sort my tasks by type

    - see **stats based on classes** to see trends in my work

    - define the **place I worked at** to see trends in my work
